EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Palan (Reg. No. 43420) on June 16, 2010.

2. Claims 149 and 151-153 are allowable as amended below.

Amendment

3. Claims 151-153 are not further amended.

4. The application has been amended as follows:

149. (Currently Amended) A method of saving web page data comprising:
providing a first and a second save option within a window of a browser client;
receiving a selection of the first or second save option from a user;
acquiring web page data browsed by the browser client when the selection of the first save option is received from the user [[and]] or when the browser client newly

browses the web page data when the selection of the second save option has been received from the user;

extracting a keyword from a content of the acquired web page data;

assigning a plurality of indices that include a first index unique to the acquired web page data and a second index comprising the extracted keyword to the acquired web page data; and

saving, subsequent to the keyword extraction, the acquired web page data browsed by the browser client in correspondence with the assigned indices in a predefined database, the saved web page data being sufficient to regenerate at least a portion of a previously browsed web page without accessing to the original source,

wherein the acquired web page data is saved without prompting the user for a file name or destination folder when the selection of the first save option is received from the user, and

the acquired web page data is saved without any further instruction from the user when the browser client is subsequently operated to move to another URL, when the selection of the second save option has been received from the user.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The prior art made of record does not teach, make obvious, or suggest the claim limitations as of the effective filing date of May 2000. The claims offer two saving

options for the URL information and keywords. The save options determine whether or not the user is prompted. When either the first save option is selected or when the second is selected and the data is new, the browser acquires the web page data for processing. Keyword indices are created in real time. The saved data is sufficient to regenerate at least part of the page. Therefore, this combination of elements as described in the claim language is allowable over the prior art.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6336117, 6928432, 7082427 teach indexing content.

U.S. Patent No. 6766458 and 6567918 teach prompting the users about saving content.
